

Raymond Recorder

Improvements At The Sugar Eactory

Following the completion of the improvements at the Sugar Factory, especially in the boiler house, we hied ourselves thither on Tuesday and spent a very profitable and interesting hour or so, with Mr. J. Simpson, head engineer of the plant, who went over the alterations and improvements and explained their expectations in the matter of economy and efficiency.

All the brick work around the boilers was torn out this summer, and rebuilt to accommodate new ideas in stoking, draft and heat production. Recording draft gauges on each boiler measure the draft from various points of the boiler, and record it where the attendant can see, and he knows exactly where the trouble is and can remedy it. The entire front is covered in with steel, and an air duct with damper connects to each boiler from fans, so that the fires can be forced right under the grates, and the air controlled with the damper to keep the flame just right to produce the heat. The grates can be regulated to travel from 9 inches a minute up, and varying qualities of coal can be regulated in this manner. They expect to save 30 tons of coal per day by this present installation, besides providing steady and uninterrupted power and steam.

The trash house has been rebuilt, and a new unit installed here which is expected to trap a great deal of the dirt trash and bones, rocks, etc. which have heretofore gone into the washer some over the picking table, and into the knives. A wheel is built in sections, turned by hand, and while one section is loading, another section is unloading, and the work goes merrily on.

Out at the mouth of the sewer another installation has been made which will reduce the waste of water, and more than ever before will go back to wash the beets, but it will be clean and free from leaves, tailings and trash which has heretofore caused trouble in the flumes.

For the past two season motors have been installed on various units to make them individually driven and operated, so that when one needs attention it does not require the stopping of the whole show to fix it. Motor after motor, with V belts are not feasible, chain drives are used, so that one unit can be overhauled and adjusted while the rest of the mill runs on. It removes a great deal of line shafting, of expensive belting, makes it safer to have the belts out of the way, and increases the efficiency of the entire plant.

It is interesting to see the gradual improvement and change from the mill as it was installed in 1925 to what it is today, and likely seven or eight years from now will see other improvements and drastic changes.

"WILD CARGO" will show the thrills that you only get once in a lifetime. Tonight and Saturday at the Capitol.

Mr. and Mrs. S. I. May sent the week-end in Calgary with Mr. and Mrs. J. H. Reid. Mrs. Reid is a sister of the editor.

Max Stead, son of Mr. and Mrs. W. H. Stead of the Green Lantern, is here with the family at present, after a long absence in the Eastern States.

Dr. and Mrs. G. W. Leech left last week for a vacation, part of which will be spent at Kaslo, B. C. During the absence of Dr. Leech from town, Dr. Schmalz of Burdett is taking care of his practice.

News Notes

Monday, September 3rd is Labor Day, and about the last summer holiday.

Conference on Tuesday, Wednesday and Thursday next week. Some of the general authorities from Salt Lake City are expected to be present.

C. W. Brewerton, his daughter Mrs. Hill and her son spent the day in Cardston, guests of Mr. and Mrs. Gordon Brewerton.

A community clean-up is in progress at the Public School now, with a number of the ladies of the Town assisting.

Don't swear at your old typewriter ribbon. Come in and get a new one. Stock is new and we have a good assortment.

Vern Henry is busy kalsomining and cleaning the rooms of the Public School before the start of school next month.

Nature's biggest thrills in Frank Buck's "WILD CARGO" at the Capitol this week-end. Be sure and see it.

Mr. and Mrs. J. A. Johansen passed thru Raymond Wednesday on their way to Stirling to the funeral of Ed. Erickson, a brother of Alif, who died there this week after a long illness. He was 72 years old.

Hail in the Cayley district Tuesday ruined some fields of grain 100 per cent. Stocked grain was damaged some, but not very seriously. Hail was piled eight inches deep in places at the conclusion of the storm.

Hon. H. H. Stevens is still telling people what he thinks, and some commentators think he is after Premier Bennett's job. Anyway he is exhibiting a real interest in the welfare of the middle and lower classes, and that is something that many politicians forget about when they get where they can.

Dr. and Mrs. Leech and Miss Walscott had as their house guests last week their nieces from Bramford, Minn., Miss Marlys Walscott, and the Misses Irene and Dorothy McNulty. The week-end was spent at Waterton, and the visitors were surprised and delighted with the beauties of the Rockies, the canyons and lakes, it being their first visit to the west.

Mr. and Mrs. C. D. Compton were host and hostess at a Golf Party Monday evening. Their guests being: Mr. and Mrs. T. Geo. Wood, Mr. and Mrs. F. R. Taylor, Mr. and Mrs. S. B. Card, Mr. and Mrs. Lee Brewerton, Mrs. S. E. Hill and son Joseph of Salt Lake City, and Messrs. Forbes, Hardy and Byerstein of the Bank of Montreal staff. A very enjoyable time is reported.

An attempted holdup was staged in the Royal Bank of Canada at High River last Friday forenoon, when an unmasked bandit slipped a note under the teller's window demanding all the five's and tens and to be quick about it. Menzies, the cashier played a few seconds for time, and the bandit moved as though he had a gun in his hand, when Menzies dropped down behind the counter and shouted "hold up". The manager came to his office door, and the staff gathered to the door thru which the bandit had fled, apparently losing his nerve, and disappeared. So far no reports have been received of his having been captured.

Mrs. Eliza Whitbeck Passes To Reward

The death occurred at the family home on Tuesday night at 8:30 p.m. of Mrs. Eliza Whitbeck, following almost continuous illness since a stroke she suffered in April of last year. At time of death she was not suffering so much, but had, in the intervening months went through terrible agony and suffering. She was nearly 72 years old, her birthday being in October. Her husband pre-deceased her several years ago. Funeral services will be held in the Stake House, Sunday at 2 p.m. with the First Ward Bishopric in charge.

Mrs. Whitbeck was the mother of fourteen children, thirteen of whom are living, the oldest boy having been killed in an accident when he was 21 years old. She had always been a loving mother, and for years was an active worker in the Relief Society of the ward, where she served faithfully and well, besides looking after her family. She had the love and respect of a wide circle of friends, and will be greatly missed by her family and many friends.

The living children are: Rodney, Asael and Marion, who live in Eugene, Oregon. A son Q. and Mrs. R. Thelin of Wilmington, Cal., Mrs. D. Clemis, Lethbridge, and Archie, Mrs. S. B. Card, Mrs. T. K. Roberts, Mrs. R. W. Kinsey, Mrs. S. E. Grey, William and Hampton, all of Raymond. There are 43 grand children, and 4 great grand children.

The sympathy of the community goes out to the children in their bereavement.

Mrs. D. G. Selman is home from her visit to the States, and reports a enjoyable time. Things are dry and burned in Utah, but the people who need help are being well cared for by the Government relief agents.

Jack Evans missed getting the ten dollars at the Capitol Wednesday night, so that next week, the prize will be \$20. Who will be the lucky person?

J. F. Elder and family and H. J. McKean and family are spending the week-end in Waterton, the men folks taking part in the Golf Tournament being held over the course this week-end.

A meeting of tradesmen of the town is called for Monday evening next in the Town Hall at 8 p.m., to discuss licensing of transients, and other points. Be there and express yourself.

Wm. Paris has had his light delivery truck painted the past week, and it looks nice and shiny in its new coat.

Three C.C.C. workers in the forest fires in the States have been killed in the past week, when they were caught and crushed to death by falling logs that had been weakened by the fire and toppled over. Two were in Idaho fires, and one in California. These are the first deaths this year amongst fire-fighters.

Successful Institute Conference Is Held

A very successful Women's Institute Conference was held Wednesday in the Raymond High School, with Mrs. A. W. Kirkham, Constituency Convenor in charge, and Mrs. C. D. Compton, secretary of the Conference. All Institutes of the district were represented, and on behalf of Raymond, His Worship Mayor Meeks welcomed the delegates and declared the Town open to them. Lack of space prevents a detailed report of the proceedings this week, but next week we will have the prize winners of the Fair, and some additional details of the Conference.

There were 160 entries in the fair, \$65 in prize money paid out, and over 100 were in attendance at the Conference. The Raymond Institute won the prize for the best Institute Flower exhibit, and also the award for taking the most prizes.

Mrs. Campbell, who had visited Peace River country gave a splendid description of this country. Addresses were given by Mrs. Thompson, District Director, and Mrs. Kirkham Constituency Convenor.

M.I.A. Meetings for Convention Conference

School Will Open September 4th

Raymond Public and High Schools will open for the fall term on September 4th, with eighteen teachers on the staffs. Twelve rooms will be held in the Public School building, and five High School rooms and one Public School grade in the High School building.

The personnel of the staff follows: High School: Paul H. Redd, Principal; John H. Blackmore, Solon E. Low, Reed Kirkham, and Lyman H. Jacobs.

Public School: J. Orvin Hickman, Principal; Milo Vance, Elmer L. Sackman, J. L. Gibb, Melvin T. King, in High School building, Lenore Scoville, Ruth Kimball, Velma Meldrum, Beulah Page, Laura Riches, Gladys James, Myrtle Johnson and Velma Nalder.

An additional room has been fitted up this summer in the Public School to care for the ever-growing school population.

News Notes

Gordon Brewerton of Cardston was a Raymond visitor on Friday this week.

Two weeks from Monday is Labor Day and a Statutory holiday. The last one before winter.

Mr. and Mrs. Welburn Van Orman and family are spending part of their holidays with relatives in Raymond.

Stores are busy these days supplying orders for harvesting crews, and it seems almost like old times. When people are busy they are happy.

If you need a typewriter ribbon, we have a fresh stock at regular prices. A ribbon for practically all makes of machines come in.

Mr. and Mrs. Kimball Anderson and family of Tyrell's Lake visited in Raymond on Sunday, and called on Mrs. L. Adams, at the home of her father C. H. Eveson.

Forest fires are still raging in the Crow's Nest Pass, but cooler weather and showers have halted them some and given the fighters a chance to gain the upper hand to some extent.

A light shower fell Monday night, but only enough to settle the dust. A good rain would be appreciated for the benefit of the crops, and specially the grass for winter pasture.

J. S. Labbat, manager of a big brewery in Sarnia, Ont., was kidnapped Tuesday as he was on his way to his office, and a note left in his car demanded \$150,000 ransom for his safety. A telephone call stated where the car would be found, but when members of the household asked who was speaking, the receiver was hung up and the connection broken. Police are working on the case in an effort to apprehend the kidnappers.

The Royal Bank branch at Cargill, Ont., was held up Tuesday by two masked men who escaped with about \$2,200 in bills and coins. Entering the bank just after opening time, they commanded the manager to open the vault, but he refused and they tired waiting for the cashier to open it, and scooped up what was in the till, escaping in a waiting car with three accomplices.

The Mutual Convention to be held in connection with the Quarterly Conference Tuesday, Wednesday and Thursday of next week, will hold joint and departmental sessions as follows, and all interested parties are requested to be present:

All convention meetings will be held in the High School building. Tuesday, August 21st, 7:15 to 9:15: Era Directors, "M" Men Gleaners, Adults, Bee Keepers. All executives and Community Activity Directors.

9:15 to 10 p.m.: All activity directors and Class Leaders. Special dances for 1934. High School gym.

Wednesday August 22nd: 3 to 4 p.m.: Recreation Institute, Drama, Speeches, Hobbies, Social Conduct.

7:00 to 8:00: Departments; Executives and Community Activity Committees. Juniors, Gleaners, "M" Men.

8:00 p.m.: General Conference in Stake House.

Thursday, August 23rd: 3 to 4 p.m.: Recreation Institute; Dancing Story, Conversation, Reading.

7: to 8 p.m.: Seniors, "M" Men, Gleaners, Scout Leaders, Vanguard Leaders.

8 p.m.: Mutual session of Quarterly Conference. Program showing activities of coming year's work.

9:30 p.m.: Dancing for everybody. Dances for 1934 and 35 will be demonstrated. This will be held in the Opera House.

Grain boxes are decorating all the trucks these days.

Boothe Card was in Turner Valley on Tuesday after a load of gas.

Will your nerves stand the thrills and amazing daring that is shown in Frank Buck's "Wild Cargo." Go to the Capitol Friday or Saturday and see.

Milk Plant Visited

By permission of the management of the Union Milk Co., Calgary, we were taken through their plant recently, which is one of the best equipped that can be found anywhere.

This Co. acts as distributors for many smaller producers around Calgary of fresh milk and cream, and they also churn surplus supplies into butter which is sold everywhere throughout Canada and the world.

We were specially interested in the system used for receiving and bottling the milk. The cans are weighed and dumped and then put through a washer where boiling water and steam is used to wash and sterilize them, and lid is put on automatically, and delivered to the owner without being touched by hand.

The milk bottles are brought in by the delivery men, put into the washer, spend twenty minutes on the trip, and are not touched by human hand again until they are put into the carrier for distribution. They are washed steamed and dried automatically with the latest equipment for this kind of work.

We watched butter testing, egg testing, cream testing, etc., all in process and could write much on each one, but in the ice cream department our interest was extremely keen in the manufacture of frozen Shirbices and like overgrown kids when we sampled one we found it the best we ever tasted. Probably because it was so fresh, or frozen so hard or something, but it had a flavor all its own. This entire plant is a model of cleanliness and up-to-date methods.

APPRECIATE IT!

Dozens of times this summer we have heard visitors from other parts of Canada and from various states of the union make the remark that this is the finest looking district they have ever been in and that as far as this summer goes, it looks like a garden of Eden, compared with most of the States to the south of us, and the provinces of Saskatchewan and Manitoba to the east. How much do we appreciate our advantages.

Do we know our district well enough to appreciate its advantages? When visitors drive around and see the beet fields, the stacks of hay, the waving fields of grain, the irrigation ditches running here and there the fat contented stock on all sides, the yearn to stop and enjoy the stability and the prosperity that these things mean. When they contemplate the advantages of the sugar factory and the beet growing industry, and the benefit of the by-products to feeders of all kinds of stock, they long for the privileges and opportunities that are ours. And yet, some of us, because of discouragement are ready to sell our birthright for a mess of pottage, and cast our lot somewhere else, where the sun always shines, and cold weather is never experienced.

We have no quarrel with those who are discontented and discouraged. Probably their lack of pep is justified. Our row, we admit, has never been very hard, and yet with many others we could have seen only the hole in the doughnut and refused to see the good part of it if we had chosen to do so, the opportunity has been here. But of what avail is such an outlook on life? We can find the sunshine of life, even in our hours of despondency and defeat, if we look for it, and we can find the dark side of every picture if we look for it. All we would ask of people is to be considerate, be fair, and try and be pleasant. If the country is not good enough for you the transportation systems of the country will take you somewhere else. Why make others miserable by your howling?

Instead of seeking everything not likable, seek for the pleasant and lovely things of our country. Many people cannot enjoy a perfect summer day because they think of what the

winter will be. Instead of enjoying a good rain they think of all the mud we are going to have after it and when the sun shines, they know the crops are going to burn up because of the drouth. People who take this view of their conditions will never find a heaven, because if they did it would be hell to them because there wasn't anything to kick about.

We are not, and never will have all the nice things of life and the beauties of nature around us, but it is a good thing for us temporally spiritually and socially to think we have a little more than anyone else. It makes the grandeur of the mountains more sublime, the verdure of the fields and hill more green, and the beautiful dome of the sky with its magnificent display of clouds, sun and storm, more beautiful. We are here, most of us to live and die, why not appreciate the tonic of the cold of winter, the cleansing qualities of our western winds, and the warm balmy breath of the Chinook. Eternal calm is very tiring.

When we have a west wind that moves the real estate be thankful that we have no tornados that tear up buildings, trees and leave a path of death and destruction in their wake. When we have sub-zero weather and heavy snows rejoice that we have no devastating floods, cloudburst and landslides that in a moment destroy the work and labors of years, and leave a path of desolation in their wake. We have no earthquakes, no tidal waves, and in fact few destructive elements to worry about, and yet because of the variety of our weather and our seasons we think we have much to complain about.

Thank an all wise providence for making us "Free to choose our lives and what we'll be," but if we are here to enjoy life and to make the earth a better place in which to live, then we should commence by cultivating a cherry disposition, an appreciation for our multiplicity of blessings and a determination to live that others seeing our good works may be lead to glorify our Father which is in heaven.

In a small village in Ireland, the mother of a soldier met the village priest, who asked her if she had had news. "Sure I have," she said, "Pat has been killed."

"Oh, am very sorry," said the priest. "Did you receive word from the war office?"

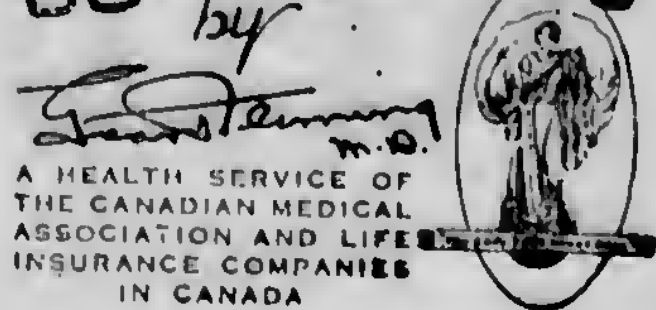

"No," she said, "I received word from himself."

The priest looked perplexed, and said, "But how is that?"

"Sure" she said, "here is the letter; read it yourself."

The letter said: "Dear mother, I am now in the Holy Land."

HEALTH

OVER SOLICITOUS

It would be a surprise for many parents, particularly mothers, to learn that the care and attention which they lavish on their children is not only undesirable, but actually harmful to the children.

We see the faults in other parents, we understand why other people's children act as they do, but, generally speaking, we are blind to our own shortcomings and readily find satisfactory explanations for the behavior of our own children.

The mother who is forever worrying about her child, who can hardly let the child out of her sight, who sits at the window while he plays out of doors, or who watches for his return from school if she does not take him to and from school — such a mother does not act in this way because she is overflowing with mother love, but rather because she herself is in an unhealthy mental state, that is popularly known as "nervousness."

An essential requisite for mental health is an ability to face life's problems and difficulties. It is easier at the time, to run away or to find excuses. Rather than write his examinations Johnny can have a headache which will keep him from school. When he wants something which he should not have, instead of taking time to explain to the child her reasons for refusal, it is easier for the mother to give in to the child's demands. But what of the future for a child who develops, early in life, the habit of avoiding difficulties by subterfuge, and who gains his own way by tears, tantrums or nagging? Is it to be expected that he will become a successful, happy adult when it comes time for him to earn his living and to stand on his own feet in a world whose problems will be very real and which will demand a "give and take", with respect for the orders of those who are set in authority.

Actually, the over-solicitous parent is more unkind than is the partly neglectful parent in so far as the future of the child is concerned. No greater kindness can be shown a child than to bring him to understand, from his earliest years, how to face the facts of life in the right manner. The child who is given this understanding will learn to be honest with himself,

to appreciate his capabilities and limitations, and to adjust himself to the world in which he must live. He will likely enjoy mental health and be a desirable citizen in his community, finding true happiness in his work and in his social life.

The child reflects the parents not only because of heredity, but because the parents direct the habits of life that are formed by the child. What type of adult will control the destinies of our country in the next generation depends chiefly upon the training that the children of today receive from their parents.

Notice to Threshermen Licenses Now Due

All operators of Threshing Rigs and Combines are required to Register each season with the Department of Agriculture at Edmonton, and obtain a License to Operate, the Fee for which is ONE DOLLAR. This fee is now Due and Payable for the Season of 1934.

All Those Operating Threshing Rigs or Combines Without Such License are Liable to Prosecution.

Applications for Licenses should be made at once to Municipal Secretaries or to

DEPARTMENT OF AGRICULTURE
EDMONTON ALBERTA

Alberta News Bulletin

Issued by the Publicity Commissioner, Govt. Buildings, Edmonton, August 12th, 1934

AGRICULTURAL SCHOOL TO RE-OPEN

Announcement is made by Hon. F. S. Grisdale, minister of agriculture, that the school of agriculture at Vermilion will be re-opened this fall, provided the registration of students is sufficient to warrant it. The school at Olds will continue to operate as usual.

JUNIOR CLUB FIELD DAYS

Field days for members of junior farmer clubs have been held at Vermilion school of agriculture, Lacombe experimental farm and the University farm at Edmonton. At all of these instructional work was given the junior members who attended in large numbers, in grain and livestock work.

TECHNICAL SCHOOL HAS GOOD SEASON

The provincial technical school at Calgary enjoyed a successful season, a total of 731 students being registered the past term. In addition 647 unemployed attended 23 classes offered, being given instruction by 36 instructors acting without salary. The school is now conducting a course in aeronautics, the only course of its kind given in Canada. It is planned during the coming term to design and build a complete aeroplane.

"The FIRESIDE PHILOSOPHER"

By ALFRED BIGGS

Winners not while losers talk.

There is no substitute for sincerity.

Without love, beauty is an empty shell.

If you absolutely can't pay, don't let it worry you.

Language counts as well as expression.

It is not a man's job to be afraid about it.

It is not a man's job to be afraid about it.

When in danger if you must, but don't

panic.

SCHOLARSHIP WINNERS

Four members of Alberta junior live stock clubs have been granted scholarships at the Olds school of agriculture. They are Graham McFarlane of Sexsmith, Virgil Blackmore of Lacombe, and Noel Heslop of Millet. The award was for general proficiency in their live stock club work.

CREAM DELIVERIES ON INCREASE

Deliveries of cream to the creameries of the province continue to show a substantial increase over last year. Nearly 14 million pounds of butterfat have been received up to the end of July, compared with 12,500,000 lbs. for the same period last year.

COAL PRODUCTION

Coal production in the province during June totalled 230,980 tons compared with 220,533 tons during June of 1933. Total production for the first six months of this year was 2,018,112 tons compared with 2,008,978 tons for the same period of 1933.

NEW MOUNTAIN HIGHWAY

Announcement of the intention of the Dominion government to proceed with the completion of the new mountain highway connecting Banff and Jasper national parks in the Alberta Rockies is received by Alberta people with considerable interest. With the announcement comes the statement that labour will be recruited from unemployed ranks at regular rates of wages, which is believed will assist in relieving the unemployment situation. The new highway, which may be completed within three years, will be one of the finest scenic routes in the world. Some 40 miles have already been completed on the Jasper end, and 17 miles on the Banff end of the route.

Through Turner Valley

It was our privilege last week end to take a trip through the widely famed Turner Valley oil fields of Alberta, a fold in the foothills of the province, running north-west and south-east on a parallel and extending probably for 12 miles or so, in about as pretty a natural setting as could be found anywhere.

Entering at the north end of the valley the site of the old discovery well No. 1 can be seen and from here south over the hogs back between Turner Valley and the Highwood River valley oil derricks are scattered along, sometimes one off by itself, and other times ten or twelve so close together that you could easily talk from one to the other without shouting.

These wells are for the most part completed, and producing a wet gas that is put through separators where the moisture is removed and turned into gasoline for motor fuels, and the dry gas forced into the pipelines to provide fuel and light for the towns in the valley and for Calgary. The wells still in course of drilling burn gas to fire their

boilers to operate the drills, and every house and cabin in the valley has a gas line into it.

The flares, which light up the sky on nights when the atmosphere permits, are simply wonderful, and awe-inspiring in their force. Controlled now to 40% of what used to go to waste, one can only imagine what it was in the old days. But even now the roar from the fires as the gas escapes, rising six feet into the air before it ignites, and then a continuous flame 24 hours a day from dozens of outlets, fills the valley with an odor of burning gas that is not very palatable. If this waste gas could be piped into homes of people who are unable to buy gas and coal, it would make a tremendous difference to the want and suffering in the province.

We visited the Highwood-Sarcee well, over the end of the Valley proper, which just blew in a little while ago, and men were busy fixing the pipe line to put it on production, and the tools, and shops were just about as they were left. It is an edge of attention to the uninitiated to visit one of these wells and see how the drilling is done.

One well of the Carleton Royalties was drilling with a rotary derrick and were down about 2,000 feet, and a column or more could be written about operations here. Three huge boilers carrying 225 pounds pressure each were furnishing the power to operate the drill, and the steam pump, by which they kept the hole clear and checked on the formations the drill is going through.

Drilling a well takes from 3 to 15 months depending on the depth and strata that is drilled through. Most wells hit production at around 5,000 to 6,000 feet, so if you can visualize in our mind how long a mile would be stood on end, you can form an idea of how far into the bowels of the earth the drills bite in their search for liquid gold.

We were impressed with the force of nature, and the tremendous power and wealth still locked up in her bosom waiting for the inquiring mind and hand of man to explore. When the opportunity presents itself, pay a visit to Turner Valley, and see if you are not well repaid for your effort.

News Notes

Geo. Brewerton left Thursday morning for a holiday trip to Seattle and other points expecting to be away about ten days.

A 20 acre field of Winter wheat on the Meldrum Bros. farm, which was threshed last week, yielded 31 bushels per acre, and graded No. 1, weighing 61 pounds to the bushel.

Aclergyman beaten badly on the links by a parishoner many years his senior, returned to the clubhouse rather disgruntled.

"Cheer up," his opponent said. "Remember, you win at the final, you will probably be burying me some day."

"Even then, said the preacher 'it will be your hole.'"

A hail storm in the Burdett and Bow Island districts Saturday afternoon, cut a swath 2 miles wide and 12 miles long, causing crop damage from 50 to 100 per cent. Some of the stones were as large as marbles, and damaged the grain that was out and stood to some extent.

Steven Palan, 18, of Wildwood, Alberta, committed suicide Sunday night by throwing himself under a C.N.R. train about six miles east of Wildwood, after he had fatally wounded Nyzie Szutika, with four shots from a revolver. The gun, still containing the shells were found in the coat he had laid beside the track just before his rash act.

Mr. and Mrs. Les, Cooper, his sister Sarah, and Mr. and Mrs. Green of Ellensburg, Wash., are spending a two weeks holiday in Canada, and surprised the local members of the family by walking in on them Tuesday evening. "Les" says the country looks better than anything they seen on the 600 mile drive over and he and Sarah are enjoying renewing acquaintances in Raymond.

After failing in two previous attempts the rescue party arrived at the remote base of Admiral Byrd's camp in the frozen vastness of the South Pole to find him weak and lonesome, but still happy. When they arrived at his shack with the tractor drawing the sledges, he opened the door and said, "Come on down fellows and get warm, I've got some hot soup for you." Byrd has spent the past five months alone in scientific observation and study.

"WAS TAKING EVERY KIND OF DRUG FOR CONSTIPATION"

Then ALL-BRAN Brought Relief

Read this very enthusiastic letter:

"I am 34 years old and as far back in my life I have been constipated. I was so bad that I had one bowel movement every five or six days. I was taking every kind of drug known for constipation.

"Now for the last two months I have been eating a little ALL-BRAN night and morning and I have at least two to three bowel movements each day."—Mr. Frank Piratzky (address furnished upon request).

Laboratory tests show Kellogg's ALL-BRAN provides "bulk" and vitamin B to aid elimination. ALL-BRAN is also a fine source of iron for the blood.

The "bulk" in ALL-BRAN is much like that in leafy vegetables. Inside the body, it forms a soft mass. Gently, this clears out the intestinal wastes.

Isn't this safer than taking harmful patent medicines? Two tablespoonfuls daily are usually sufficient. Severe cases with each meal. If not relieved this way, see your doctor.

You'll enjoy eating Kellogg's ALL-BRAN as a cereal with milk or cream—sugar or honey or fresh fruits added. Or, to use in cooking.

In the red-and-green package. At all grocers. Made by Kellogg in London, Ontario.

Local Crop Conditions Good

Local crop conditions are still favorable as far as weather is concerned, although moisture would be welcome, as the work is very dusty and disagreeable, the binder being almost invisible at times because of dust.

S. I. May was a Magrath visitor Tuesday afternoon on business.

After all our grumbling about the hot weather, it won't be long now until we will wish we had some of it back again.

Buy advertised products and get the protection that is behind these products for you.

Machine men report a good binder season, with 15 or 16 new machines going out, besides quite a business in used machines.

Thursday afternoon the air was full of smoke, and ashes from the forest fires were falling continually. At night it looked like a heavy fog the pall of smoke was so thick. Friday morning the air had cleared out some, but the air was still smelling of smoke, and a hot dry day was forecast.

However, the work is being pushed as rapidly as possible, and a goodly percentage of the crop will be in the stack by the end of this week. Some are combining, but very few are waiting for the grain for the combine. If they have the time they cut it and stook it and combine what is ready.

Fall grain that has been threshed has been a good color, grade and weight, and has yielded as high as 34½ bushels per acre, which yield came from the farm of Mejdram Bros. south of town. There has not been enough spring grain threshed to give any indication of average yield, but prospects are good for a yield of from 22 to 27 bushels on the average, with some fields going over the 30 bushel mark. Threshing will be general in another ten days.

Beets are looking very good, and give promise of a splendid crop, and from the amount of sunshine in July and August, the sugar content should be as high if not higher than any year yet. The officials have not made any estimate as yet, but a total tonnage as large as 1932 is expected, when 150,000 tons were delivered to the sheds.

News Notes
FOR SALE—One Walnut bed, one way sagless springs also one victrola with records. See Elsie Mitchell.
FOUND—A harness. Owner may have same by paying for this ad, and identifying the harness.
 Jensen Bros. have traded in their old Chevrolet truck on a new Ford V8. The new truck certainly looks like it was built for heavy work and plenty of it.
LOST—Team of horses, sorrel gelding, weight about 1,500 lbs. and Clyde mare about 1,400, both branded —B3 on left thigh. Reward for information leading to recovery. Notify John Bascom or Phone 24, Raymond.
 The heavy demand for irrigation water makes it a sort of catch as catch can proposition, and one has to take it when he can get it, and he is lucky if he can keep it when his turn comes. The flow is smaller than usual too.

Quarterly Conference of the Kenneth and Marjorie Walton Alberta Stake is in session Saturday from Diamond City are guests urday and Sunday of this week, of Mrs. Boyson for the week.
